### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The claims are allowable over the cited prior art because the prior art does not teach, disclose nor make obvious the claimed method to normalize the contractile response of vasculature in response to a vasoconstrictor agonist in a patient in need of such normalization, the vasculature comprising a vascular smooth muscle cell layer and a compromised endothelial cell layer, wherein the method comprises administering a pharmaceutically effective amount of a CLC3 blocker, or a pharmaceutically acceptable salt thereof, and wherein the vasoconstrictor agonist is norepinephrine.

The prior art of record, Grainger teaches a method of inhibiting smooth muscle proliferation in a patient who has hypertension, diabetes, or who has had vascular surgery, through the administration of tamoxifen or its structural analogs.

Stromberg of record is drawn to a method of blocking or reversing vasoconstriction of an intentionally or unintentionally administered adrenergic agent such as norepinephrine.

Thus, although both Grainger and Stromberg teach the administration of tamoxifen, they teach it for different purposes to different patient populations.

Therefore that there is no motivation to combine Grainger and Stromberg to normalize the contractile response of vasculature in response to a vasoconstrictor agonist in a patient in need of such normalization, the vasculature comprising a vascular smooth muscle cell layer and a compromised endothelial cell layer, wherein the method comprises administering a pharmaceutically effective amount of a CLC3 blocker, or a

pharmaceutically acceptable salt thereof, and wherein the vasoconstrictor agonist is norepinephrine.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
